ENVIRONMENT AND ENERGY
USAGE POLICY

Policy Document On Environment and Energy Usage

The Environment and Energy usage Policy of St. Gonsalo Garcia College, Vasai is always focused on optimum use of energy resources, which in turn help to reduce carbon emission. This policy implies to explore the renewable energy resources which are known as clean energy for sustainable development and as solutions to the energy crisis.

Our environment and energy policy is applicable to all the stakeholders of the college. The college activities are always bound to energy conservation. It will help us to immerse efficiency and environmental awareness into our daily activities and help us to realize our responsibilities and commitment to conservation of natural resources and its optimum usage.

Policies:

- To examine our energy consumption and measure its impacts on the environment.
- To improve campus air quality by using eco-friendly vehicles and encouraging students to use bicycles, public transport and E-vehicles.
- To install solar panels for the generation of renewable energy.
- To install LED lights in the college campus and classrooms to reduce energy consumption.
- To initiate waste management practice on college campus.
- To develop rain water harvesting mechanisms and tree plantation drives.

- To engage in dialogue with the government agencies, local authorities and NGOs to work in the areas of energy efficiency and sustainable development.
- To design college activities in an eco-friendly manner to create awareness among the students.

This policy is communicated and made available to all the stakeholders on the college website. The policy is timely upgraded through the suggestions provided by the stakeholders under the supervision of Principal and college management.
