## About the College

The historic place 'Vasai' (Bassein) has been an important landmark from times in the distant past. Surrounded by the Sahyadri Mountains to the east, enriched by the alluvial soil of the Vaitarni, this beautiful green belt is bordered by the boisterous Arabian Sea to the West. Our college is ensconced in this secure rustic world which is fast changing into a modern industrial environment and lifestyle.

During the 1980's the Catholic community in and around Vasai felt the need of opening an institution of higher learning. Since 1889, the Roman Catholic Church of Our Lady Of Grace, Pappy-Bassein has been involved to cater to the educational needs of the Catholic community.

The college was established in June 1984 and presently runs several undergraduate and postgraduate programmes. We also have a research center in the subject of Rural Development. At present we cater to 3936 students.

## About the ICSSR - WRC

The Indian Council of Social Science Research, an autonomous organization, was established by the Government of India in 1969. It in turn, established the Western Regional Centre (WRC) with the approval of the Government of Maharashtra, in January 1973 in collaboration with the University of Mumbai on the new campus of the University of Mumbai at Vidyanageri.

The ICSSR has before it the primary objective of promoting research in social sciences. Social science research in the country has a long history. Valuable contributions have been made by scholars of outstanding ability and international repute in their own fields. Research has made strides both in regard to conceptualization of problems and empirical analysis.

## About the Conference

The profound richness of Bharatiya Dnyan Parampara (Indian Knowledge Systems) reflects an intricate tapestry of intellectual, spiritual, scientific, economic, and artistic traditions that have shaped human understanding for millennia. Rooted in ancient scriptures, philosophies and practices, IKS embodies holistic wisdom that transcends disciplinary boundaries and offers insights into contemporary challenges. This international conference will provide a platform for global researchers to discuss and deliberate to discern and debate various aspects of Indian Knowledge System (IKS) in the present context. It will add value to the researchers' knowledge which will reflect in their upcoming research. This in turn, would develop different insights among researchers to look into the contemporary, socio-economic and cultural issues faced by the people. Further, It aims to serve as a global platform to explore, discuss, and share the diverse dimensions of IKS. The conference will bring together scholars, researchers, practitioners, and thought leaders from various disciplines to investigate how the traditional knowledge systems of India continue to hold relevance in modern contexts, ranging from science and technology to philosophy, linguistics, commerce, arts, and ecology. The proposed conference will bring reflections on this and will show the way forward for academicians, leaders and policymakers.
